***REMINDERS:** Prescribe or dispense the drug form, dosage, and type (generic vs. name brand) **AS IT APPEARS** on the formulary. In most cases the generic form is the lowest-priced version of a medication but there are some exceptions, with the name-brand having a 340B price lower than generics. If you need to prescribe or dispense a drug or dosage not listed on the formulary, please **NOTIFY** your local health outreach staff.*
